PROJECTS

Multivendor Restaurant Platform

- Designed and implemented a dynamic eCommerce platform for online food delivery, enabling users to browse diverse restaurant menus, place and customize orders, and securely process payments. The website features a responsive design and interactive elements to enhance user experience.
 - Key Features: User-Friendly Interface: Intuitive navigation for browsing menus, selecting items, and placing orders.
 - Secure Payment Processing: Integrated Stripe API for handling online transactions with robust security measures.
 - Real-Time Updates: Dynamic menu updates and order tracking for enhanced customer engagement.
- Backend Management: Efficient order processing and data management using Django's backend framework and ORM.

Impact:

- Together, these skills empower me to tackle complex projects, from database design to front-end development, and deliver comprehensive web applications that meet diverse requirements

CERTIFICATION:

- Basic Python programming and Introduction to AI by DHAAPPS.
- Python Django: Building a Powerful Multi-Vendor Restaurant Platform
